

# Fire Service Training

Oklahoma State University | College of Engineering, Architecture and Technology

## 2017 Fiscal Year Annual Report

COLLEGE OF  
Engineering, Architecture and Technology

Oklahomans,

We appreciate the dedication and professionalism of Oklahoma firefighters and other emergency responders. FST continues to strive to meet the training needs all across the great state of Oklahoma. We very much appreciate our training partners that help to keep Oklahoma firefighters safe and help return these dedicated professionals, both career and volunteer, safely to their families at the end of their shift.

Dr. Erick Reynolds  
Director, Fire Service Training

## Grain Engulfment / Confined Space Rescue Trailer

OSU Fire Service Training, in partnership with Bio-systems, Agricultural Engineering and Triangle Insurance worked to design the grain engulfment and confined space rescue simulation trailer. This one-of-a-kind rescue trailer was funded by an assistance to firefighters grant. The trailer will be used in support of

training that is a product of the Susan B. Harwood OSHA grant. The purpose of the trailer is to train first responders and grain industry employees on how to work safely in grain storage bin environments, and if need be, how to safely rescue grain industry employees from grain engulfment if the need arises.
